

How To Look Like Your Most Glamorous Self This Holiday Season — As Seen On CBS Austin's "We Are Austin"

From New Year's Eve bashes to office holiday parties and family get-togethers, 'tis the season to be jolly — and to look like a million bucks while decking the halls and rockin' around the Christmas tree. And, with the TV Critics Awards and the Golden Globes approaching in January of 2018, it's the perfect time to tap into our own inner Hollywood starlet and learn some beauty tricks that will help us exude glamour and poise. I stopped by CBS Austin's "We Are Austin" this morning to offer some beauty tips on how to enjoy your own red carpet-worthy moment, so make sure to check out the two-part segment. You can view the embedded segment videos above or [click here for Part 1](#) and [click here for Part 2](#).

Below, learn more about all the products seen on the show — from a breakthrough haircare brand to an oil-absorbing and makeup-refreshing translucent compact. Read on!

CAMOUFLAGE BLOTCHY PATCHES, BRUISES, AND SCARS WITH ISDIN

Imagine a foundation that's delightfully lightweight but can conceal everything from vitiligo to scars, burns, bruises, acne marks, and dark spots. Does that sound like a pink unicorn? Well, it isn't! Barcelona-based brand ISDIN, the No. 1 dermatological brand in Spain, accomplished this seemingly impossible feat when it formulated its **ISDINCEUTICS Skin Drops**. It's the first liquid makeup in dropper form that lasts up to 12 hours, and it provides adaptive coverage, so that each shade will work on a multitude of tones. The **ISDIN ISDINCEUTICS Skin Drops** (\$52 at select dermatologist offices and at [ISDIN.com](#)) come in three shades: Sand, Bronze, and a brand new Caramel color. The drops can be used individually or they can be blended together in order to create the perfect match for your skin tone.

As for how to use these, there are two great options: the first is to apply the drops directly to the face and blend the color using a brush or your fingertips, while the second involves mixing a few drops with a face cream in order to create a tinted moisturizer. One great option, then, is adding a few Skin Drops to the new **ISDIN ISDINCEUTICS Age Contour Cream** (\$100 at select dermatologist offices and at [ISDIN.com](#)), which is designed to correct such visible aging signs as jawline sagging, to reduce the formation of A.G.E.s (Advanced Glycation End Products) that lead to a decrease in elasticity and to the appearance of wrinkles, and which to protect the skin against the harmful effects of pollution. By mixing the Skin Drops with the Age Contour Cream, you get to enjoy anti-aging benefits and superb coverage.
